

ES 117: World of Engineering

Group Reflection Assignment

Weight: 10 Marks

Submission Due: April 20, 2026

No late submission allowed

Submission Mode: In-person to TAs

Assignment Nature

This is a **group assignment** worth **10 marks**. The grade awarded on this reflection will apply to the **entire group**. It is to be completed collaboratively during **class on April 13, 2026**, and only **one submission per group** should be made.

Submission Format

- The reflection must be **handwritten**.
- The reflection should be approximately **250–300 words**.
- Use the provided **group reflection submission sheet**.
- Page 1 of the submission sheet must be filled completely and must record the names and roll numbers of group members present during the reflection meeting.
- Page 2 of the submission sheet provides space for up to **30 signatures**.
- This assignment will be submitted **in person to the TAs**.
- The **submission box** will be placed and announced to you.

What the Reflection Should Address

- How the team framed the problem and translated it into an engineering task.
- How the project evolved from the initial concept stage to the current prototype stage.
- What major design choices, trade-offs, or revisions shaped the final direction.
- What the team learned from collaborating, building, testing, and revising the system.
- The most important takeaway for the group from this project journey.

Academic Integrity

- This reflection must be the group's own work.
- The use of **ChatGPT**, other **agentic AI tools**, or AI-generated writing is **not allowed**.
- Any detected use of such tools will result in a **straightaway F grade** and **reporting to SSAC**.
