

ES 117: World of Engineering

Individual Reflection Assignment

Weight: 10 Marks

Submission Due: April 20, 2026

No late submission allowed

Submission Mode: In-person to TAs

Assignment Nature

This is an **individual assignment** worth **10 marks**. The grade awarded on this reflection will apply to the **individual student**. The reflection should connect your **first ideation assignment**, completed individually at the beginning of the course, with the **current stage of your project**, when the prototype is nearly ready.

Submission Format

- The reflection must be a **handwritten submission**.
- The reflection should be approximately **200–300 words**.
- Use the provided **individual reflection submission sheet**.
- The submission sheet must include your **name, roll number, project group number, and project name**.
- This assignment will be submitted **in person to the TAs**.
- The **submission box** will be placed and announced to you.

What the Reflection Should Address

- How your perspective as an engineer has evolved during the course.
- What excited you during the project and why.
- What frightened, challenged, or unsettled you during the process.
- How your understanding of engineering, design, prototyping, and problem-solving changed with experience.
- What your **single biggest takeaway** from the course has been.

Writing Expectations

- Write clearly, honestly, and specifically.
- Focus on reflection, not summary alone.
- Use concrete examples from your own project experience wherever possible.
- The writing should show thoughtful engagement with the course and with the process of becoming an engineer.

Academic Integrity

- This reflection must be your own work.
- The use of **ChatGPT**, other **agentic AI tools**, or AI-generated writing is **not allowed**.
- Any detected use of such tools will result in a **straightaway F grade and reporting to SSAC**.
