

Lesson 18: Rewriting and peer feedback

HS192 Introduction to Writing - 2
@ IITGN, 2025-26

Today's learning objective

**Write, rewrite,
and exchange peer feedback**

Individual work

Complete writing following the rubric. You need 4 types of paragraph:

- (i) **Motivation**: Introduce the routine(s) of your choice and why it is meaningful to keep track of it/them.
- (ii) **Methodology**: Explain the device and methods used to collect the data, and the labels/contexts you chose to present together with the numbers.
- (iii) **Main body**: Discuss noticeable numbers, patterns, or correlations in text, referring to accompanied table(s) and graph(s). Justify your choice of graph.
- (iv) **Conclusion remarks**: 1-2 sentences of restatement and related thoughts.

The rubric

Format	File and page	File and format settings were perfectly followed: (i) Google doc; (ii) File name follows HS192_25-26_section##_roll-number_given-name; (iii) page size A4 with 1" margins
	Paragraphs	(i) No indentation for the first paragraph under each heading only & 0.5" indentation for the rest paragraphs, (ii) 1.5 spacing for all paragraphs, (iii) Times New Roman, font size 11 pt (13-15 pt for title)
	Writer/ course information	Writer/course information is presented well, right-aligned. Title captures the message of your data and interpretation.
Content	1. Motives & 2. Methods	At least one paragraph (approx. 3-5 sentences) introduces the routine(s) of your choice and why it is meaningful to keep track of it/them. At least one more paragraph (approx. 3-5 sentences) explains how you documented/accessed the number, and what labels/contexts were considered and selected.
	3. Main body (texts)	Paragraphs surrounding the graphics clearly deliver the main message(s) of the data and interpretation(s) well. A logical reason is given for why a specific type of chart is chosen/used.
	(graphics)	All table(s) and chart(s) are well organized with relevant caption at the correct location. They contain key information for interpreting the graphic, including (i) topic (& subtitle), (ii) unit(s) for numbers, (iii) labels/legends/categories.
	4. Conclusion	A short paragraph restate the message of the data, and conclude the essay with a prediction, suggestion, or any relevant piece of thoughts.

Individual work

Takes time to make a story on your own.

- (i) **Motivation** & (ii) **Methodology**: Clarify essential information compactly and clearly.
- (iii) **Main body**: The number of paragraphs match the number of numbers/patterns/correlations you found. Each paragraph will typically begin with a topic sentence and be followed by detailed expression referring to a table and/or a graph.
- (iv) **Conclusion remarks**: Keep it simple as an outro.

Today's learning objective

**Write, rewrite, and
exchange peer feedback**

Peer feedback

We need another set of eyes to improve our work and gain a new insight.

Reviewing your peers' work also benefits you in the sense that it strengthens your analytical reading and writing skills.

You and your peers are cooperating to make your essays better communicate.

Let's be sincere when exchanging questions, concerns, and suggestions.

Let's provide effective feedback

Hattie and Timperley 2007

1. Feed up: Be criteria-based

Use the criteria in the provided rubric to focus on your feedback on the provided purpose and goal of the assignment.

2. Feed back: Prioritize and specify your feedback

Prioritize the **amount** of feedback. The receiver of the feedback can only manage a few and specific points.

Prioritize the **type** of feedback. Focus your feedback on the content and structure (e.g., topic sentence, supporting details, flow) rather than the form (e.g., spelling, grammar).

Be **specific**. Avoid feedback like “I think your assignment is good” but make it constructive by specifying what you comment on: “I think what you wrote in the second paragraph interesting because....”

3. Feed forward: Point out potentials

Look for potential and give specific suggestions for what your peer can do to go forward.

Avoid judgement, but proceed from your reading experience and the provided criteria to help your peer move forward:

- *"I became very interested when I read about..., because..."*
- *"I got exactly the information I needed in section..."*
- *"I cannot understand..., because..."*
- *"I would like an elaboration on..., because..."*
- *"On page... you write.... I am curious on what you are basing this idea"*
- *"I suggest that you...."*

4. Receiving feedback

- Reflect on the feedback you have received and how you will use it.
- Take responsibility for your own assignment. Feedback is not a judgement and does not have to be the final answer. You can receive your feedback and reflect on it, but you are not obligated to use it.
- Give feedback on the feedback by saying thank you and telling which part of the feedback was particularly useful to you.

Summary

1. Feed up

Review based on the rubric

2. Feed back

Prioritized amount and type of feedback; specific

3. Feed forward

Suggest; point out potentials

4. Receiving feedback

Reflect on feedbacks to choose what to apply; give feedback on feedback

Group activity

3 minutes for reading the rubric and discuss the criteria.

5 minutes per each member's work

1. First, review the work and check the criteria (feed up)
2. Then, give feedback on a selected few specific aspects (back), desirably with suggestions (forward)
3. The writer is noting down the feedback and appreciate it.

The rubric

Format	File and page	File and format settings were perfectly followed: (i) Google doc; (ii) File name follows HS192_25-26_section##_roll-number_first-name; (iii) page size A4 with 1" margins
	Paragraphs	(i) No indentation for the first paragraph under each heading only & 0.5" indentation for the rest paragraphs, (ii) 1.5 spacing for all paragraphs, (iii) Times New Roman, font size 11 pt (13-15 pt for title)
	Writer/course information	Writer/course information is presented well, right-aligned. Title captures the message of your data and interpretation.
Content	1. Motives & 2. Methods	At least one paragraph (approx. 3-5 sentences) introduces the routine(s) of your choice and why it is meaningful to keep track of it/them. At least one more paragraph (approx. 3-5 sentences) explains how you documented/accessed the number, and what labels/contexts were considered and selected.
	3. Main body (texts)	Paragraphs surrounding the graphics clearly deliver the main message(s) of the data and interpretation(s) well. A logical reason is given for why a specific type of chart is chosen/used.
	(graphics)	All table(s) and chart(s) are well organized with relevant caption at the correct location. They contain key information for interpreting the graphic, including (i) topic (& subtitle), (ii) unit(s) for numbers, (iii) labels/legends/categories.
	4. Conclusion	A short paragraph restate the message of the data, and conclude the essay with a prediction, suggestion, or any relevant piece of thoughts.

Debrief

Name one area of growth that you discovered about your writing.

Name a piece of feedback that you received from your peer group.

Reflect and apply reviews

Integrate and evaluate suggestions and reflect them into your work.
